

## Safety protocols for staff (covid 19)

All staff are to wear masks in their interactions with others and in common areas. You are not required to wear a mask in your office if you have an office and are working alone.

All staff will be socially distanced in all meetings and interactions.

If a staff member feels ill or a family member gets ill, or hears news that they have been exposed, the staff member must notify Kim Case or Pastor Stan and start working from home. They will not be allowed to return to work until they have received a negative test for Covid 19.

All staff persons thereby give permission to let the rest of the staff know of such illness or exposure out of care for the health of the rest of the staff.

Contact tracing will be conducted for the affected staff member and all persons they had contact with at church will be notified or in the case of interaction with many, a notice will be sent to the entire church.
